Shipwrecks

Shipwrecks are the remains of ships that have sunk or been destroyed, often due to storms, collisions, or wars. They can be found in oceans, rivers, lakes, and other bodies of water all over the world, sometimes hidden in the depths of the ocean and sometimes visible from above the waves.

Shipwrecks can be valuable sources of historical, archaeological, and cultural information, as they often contain artefacts, cargo, and human remains that shed light on past societies and events. They can also be dangerous and environmentally harmful, as they may leak fuel, chemicals, or other pollutants into the water and pose hazards to navigation and marine life.

Rainforests

Rainforests are lush, warm, wet habitats. Trees in the rainforest grow very tall because they have to compete with other plants for sunlight. Kapok trees, which are found in tropical rainforests around the world, can grow to 200 feet. The tallest trees spread their branches and leaves, blocking the light from the trees below and creating a canopy over the forest. When one of the big trees dies and falls, the opening lets in more sunlight so that a smaller tree can grow and take its place.

The rainforest has four layers. The emergent layer is made up of the very tallest trees that rise higher than the rest of the forest. In the next layer, the canopy, the leaves and branches of the trees all touch one another or are connected by vines. The layer below the canopy is called the understory. Small trees and plants that do not need much light grow here. The last layer is the forest floor where only a few plants grow because it's so dark.

Charles Darwin

Charles Robert Darwin (February 12 1809 – April 19 1882) was an English naturalist. He was born in Shrewsbury, Shropshire. He is famous for his work on the Theory of Evolution. His book *On the Origin of Species*, which was written in 1859, was notable for many reasons: it suggested evidence that evolution has taken place and it presented a theory to explain how evolution works. That theory is called natural selection. The book says that evolution and natural selection are the keys to understanding the diversity of life on Earth.

Darwin spent almost five years aboard a Royal Navy exploring ship, the HMS Beagle. The voyage took place from December 1831 to October 1836. While the navy was making maps and charts, Darwin was responsible for collecting and making notes about the animals, plants, and the geology of the countries they visited.

Poetry

Extract from 'Song' by Christina Rossetti

When I am dead, my dearest,
Sing no sad songs for me;
Plant thou no roses at my head,
Nor shady cypress tree:
Be the green grass above me
With showers and dewdrops wet;
And if thou wilt remember
And if thou wilt, forget.

“Beware the Jabberwock, my son!
The jaws that bite, the claws that catch!
Beware the Jubjub bird, and shun
The frumious Bandersnatch!”

He took his vorpal sword in hand;
Long time the manxome foe he sought—
So rested he by the Tumtum tree
And stood awhile in thought.

**Extract from 'When Lilacs Last in the Dooryard Bloom'd'
by Walt Whitman**

In the dooryard fronting an old farm-house near the white-wash'd palings,
Stands the lilac-bush tall-growing with heart-shaped leaves of rich green,
With many a pointed blossom rising delicate, with the perfume strong I love,
With every leaf a miracle—and from this bush in the dooryard,
With delicate-color'd blossoms and heart-shaped leaves of rich green,
A sprig with its flower I break.

Extract from 'Goodnight Mr Tom' by Michelle Magorian

'His name's Willie,' said the woman. Willie, who had been staring at the ground, looked up. Round his neck, hanging from a piece of string, was a cardboard label. It read 'William Beech'. Tom was well into his sixties, a healthy, robust, stockily built man with a head of thick white hair. Although he was of average height, in Willie's eyes he was a towering giant with skin like coarse, wrinkled brown paper and a voice like thunder. He glared at Willie. 'You'd best come in,' he said abruptly. The woman gave a relieved smile. 'Thank you so much,' she said, and she backed quickly away and hurried down the tiny path towards the other children. Willie watched her go.

Extract from 'Kensuke's Kingdom' by Michael Morpurgo

I disappeared on the night before my twelfth birthday. July 28 1988. Only now can I at last tell the whole extraordinary story, the true story. Kensuke made me promise that I would say nothing, nothing at all, until at least ten years had passed. It was almost the last thing he said to me. I promised, and because of that I have had to live out a lie. I could let sleeping lies sleep on, but more than ten years have passed now. I have done school, done college, and had time to think. I owe it to my family and to my friends, all of whom I have deceived for so long, to tell the truth about my long disappearance, about how I lived to come back from the dead.

"At these times," said Dumbledore, indicating the stone basin, "I use the Pensieve. One simply siphons the excess thoughts from one's mind, pours them into the basin, and examines them at one's leisure. It becomes easier to spot patterns and links, you understand, when they are in this form."

"You mean ... that stuff's your thoughts?" Harry said, staring at the swirling white substance in the basin.

"Certainly," said Dumbledore. "Let me show you." Dumbledore drew his wand out of the inside of his robes, and placed the tip into his own silvery hair, near his temple.
