

Key Vocabulary

digest	oesophagus	stomach	small intestine	large intestine	rectum	teeth
herbivore	carnivore	omnivore	producer	predator	prey	

1. Explain what happens to food as it travels through the human digestive system. Describe the simple functions of the mouth, stomach and intestines
2. What are the different types of teeth humans have, and how does each type help us when we eat?
3. What do animal's teeth tell us? (use the words **herbivore**, **carnivore** and **omnivore** in your answer)
4. Use the animals below to create a food chain:
grass, grasshopper, frog, snake.
Label which one is the producer, which are the prey, and which is the predator.
